

New Pump Makes Liquid Transfer Easier and Safer

A new, low-cost pump is quickly making management of liquids more efficient in auto repair and fleet maintenance facilities.

This small, versatile pump is safe for use with more than 600 liquids — including gasoline, diesel fuel, additives, lubricants and transmission fluids.

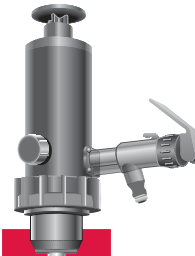

A few of the many applications of these revolutionary pumps include:

- Transferring fuel, lubricants, brake & transmission fluids to vehicles
- Decanting and applying cleaners and degreasing agents
- Mixing fuels with precise amounts of additives without drips or spills

GoatThroat pumps are marketed exclusively by Westcott Distribution, Inc., throughout North America, Mexico and the Caribbean Islands.

For further information, please contact Westcott Distribution at (646) 486-3636, or send an e-mail message to info@GoatThroat.com.
