

**QUICK GUIDE FOR SAFE OPERATION**

Stand with feet shoulder width apart approx. 6-8" away from pump to install stand-off and pump.

Pump with feet shoulder width apart and use two hands standing close to the pump.

Utilize step-stool for pumping for those under 5' 6" when using 4" stand-off. Utilize 8-12" step-stool/ladder when using 12" stand-off for all heights.

When operating with a 5-gal drum: Set drum on a stable surface at least 27.5" in height. Then follow steps 1-3.

When using remote tap: Place container you are pouring liquid into close enough to spout to avoid bending or twisting of the back. Keep your feet wide while you use the remote tap dispensing liquid into a container that is closer to the floor. Be sure either the hose is long enough to reach or you bring the container closer to the tap.
